

EXERCISE

1. Create 2 HTML pages
 - ☐ Both pages should have a heading and 2 paragraphs
 - ☐ One page should have a list
 - ☐ One page should have an image
2. Link these two pages together
3. Create a third page, with some content
 - ☐ Link the third page to the other two
4. Create an external CSS file which is linked to all three HTML pages
 - ☐ Use external CSS to make the background colour of all the HTML pages yellow
 - ☐ Use internal CSS to change one pages background to green
 - ☐ On the index page, make one paragraph blue and one paragraph red
5. **EXTRA:** Try changing the font size, and adding a border to one paragraph
